

Leafy-prairie Clover

LPC092507

IDENTIFICATION: The perennial Leafy-prairie clover (*Dalea foliosa*) grows to 1½ feet and produces small purple flowers in late July to August.

FORESTRY CONSIDERATIONS: This species needs full sun and has trouble with encroachment by woody species. Habitat destruction, overgrazing and herbicide use may damage or kill this species.

DISTRIBUTION BY COUNTY: It is found in Franklin, Jefferson, Lawrence and Morgan counties.
